

To Whom It May Concern,

We had the pleasure of working with Mike Gogel over the summer of 2014. We had a \$250,000 practice facility renovation scheduled and no idea who we would want to design it.

Mike was a bit of an unknown architect to us, however, during his presentation and proposal for his services we knew he was a perfect fit. Mike was far and away more prepared and more engaged than the six other architects we interviewed. We felt extremely comfortable with Mike right from the beginning.

In my opinion, bringing Mike on board was just as if not more important than the contractor we hired. Mike was incredibly professional and respectful of our wishes as he blended our ideas with his expertise. He really worked hand in glove with us on our behalf overseeing the renovation to ensure contractor quality and protecting project integrity as well as our investment. The project was completed on time and under budget.

Mike made the experience a very educational one for me and I cannot express how important our working relationship was to our success. It has been just over a year now and the community has benefited from a quality practice facility and express their gratitude for Mike's work on a daily basis.

The experience was such a positive one for our community that Mike Gogel Design Services will be our preferred vendor when we have other course projects in the future.

Should you have any questions regarding Mike Gogel's work, professionalism or expertise please do not hesitate to contact me.

Professionally,

Bernie Eaton, PGA
