To Whom It May Concern:

This letter is about our working relationship with Mike Gogel Golf Design over the last decade here at SaddleBrooke One. SaddleBrooke One is a large retirement community north of Tucson, AZ with a 27-hole golf facility that hosts over 75,000 rounds annually. Working with Mike had been a pleasure over this time as he has contributed significantly to improving the golf experience. Mike is easy to work with and goes out of his way to make sure he is getting feedback from all parties involved to any potential change to the course. He has proven here at SaddleBrooke One his ability to combine golfer perspective with maintenance concerns, as well as the financial parameters in all of his design proposals.

Mike began his work at SaddleBrooke One with a design to renovate our practice facilities. He increased the size of our grass teeing area to match the use as well as re-imagined the short-game area. These changes improved the practice experience for our golf community. Creating a Master Plan for all 27-holes was the next project Mike completed. He offered suggestions and options for each hole on the course. He worked closely with our Golf Committee and Maintenance Team during the formulization of the final plan. We are currently using this document to continue yearly course improvements, most recently with the re-design and construction of two greens on our SaddleBrooke Course. The improvements have been extremely well received within the community. His oversight during the construction process was a big factor in the projects successful on-time and on-budget completion.

The relationship with Mike Gogel Golf Design and SaddleBrooke One has been a big “win” for our golfing community. We would be happy to personally discuss our track record of success working with Mike Gogel Golf Design over the last decade. Please don’t hesitate to contact us.

Sincerely,

Michael Roddy  
Director of Golf and Grounds
